

The dye sublimation process involves using specific sublimation inks that once heat activated under pressure will penetrate and transfer the image to the fabric. The sublimation process is permanent because it dyes the fibers of the fabric. Dye sublimation fabric banners can be washed, steamed and ironed.

Colossus and Kaleidoscope Select are premium fabric dye sublimation products that feature a rich, vibrant color spectrum and excellent image quality.

Kaleidoscope Select can be produced up to 70" wide without a seam. See fabric choices for maximum print width.

8 Color Dye Sublimation

Colossus is perfect for larger fabric graphics or high volume orders of smaller graphics. Colossus panels can be seamed together to create monster-sized banners. Maximum graphic width or height without a seam is 120".

Both four color and eight color graphics are available.

Diamond Finish is a proprietary lamination process for fabric graphics that produces greater image opacity and prevents edge fraying. Diamond Finish is lightweight, durable, strong and produces radiant color.

Diamond Finish is only available for graphics installed in roll up banner stands.
